

Enhancing cricket viewing experience on a mobile phone

Design Degree Project (Stage II)

Guide: Prof. Ravi Poovaiah

Shaswath V
Sr. Interaction Design
IDC, IIT Bombay

About the Project

The aim of this project is to design a cricket application on a mobile phone that enhances cricket viewing experience of a person.

The application is aimed at people:

- Who watch cricket
- Who have access to mediums to watch cricket
- Who are at work/ away from home

Need of the Project

Aim of the Project:

The aim of this project is to design a cricket application on a mobile phone that enhances cricket viewing experience of a person.

Why Enhance?

The widely followed existing medium for watching cricket is TV and whatever is shown is purely base on *editors choice* from stats to Advertisements

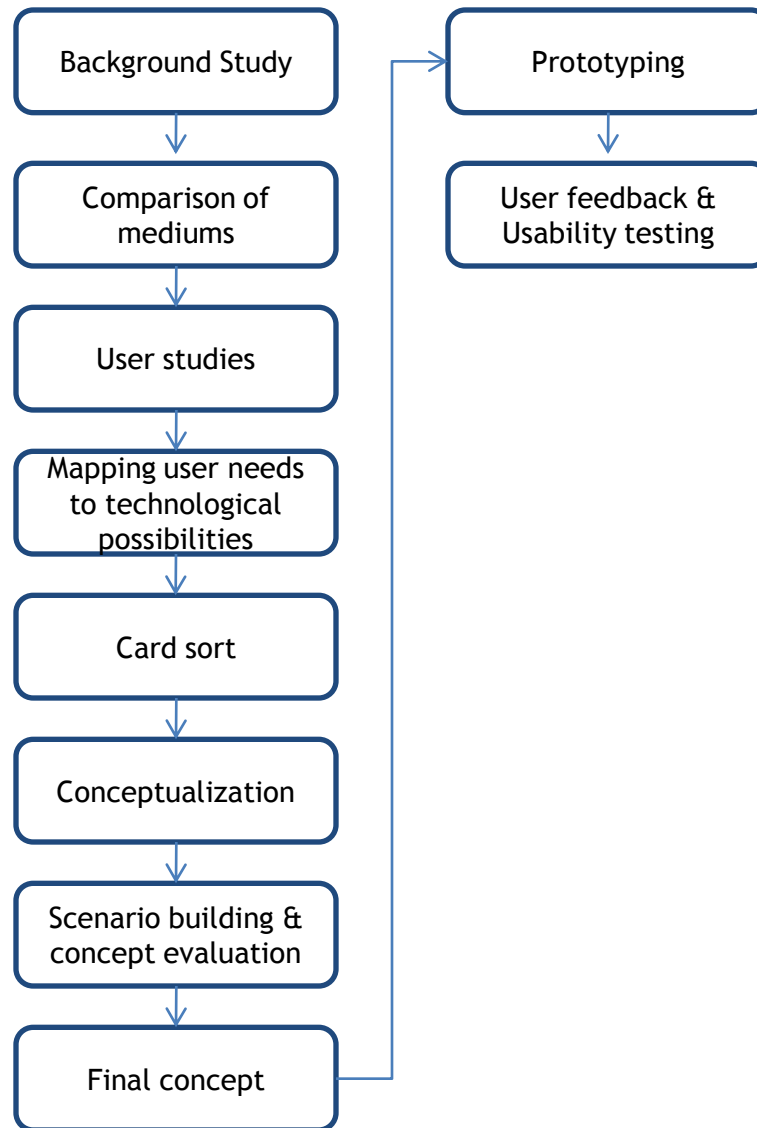

The widely reachable medium like Internet majorly displays *only static information*, ironically being a medium that uses the wide possibilities of computing power

Why Mobile Phone?

Usually cricket matches take place when people go to work and there is a high probability for them that they cant view it at home.

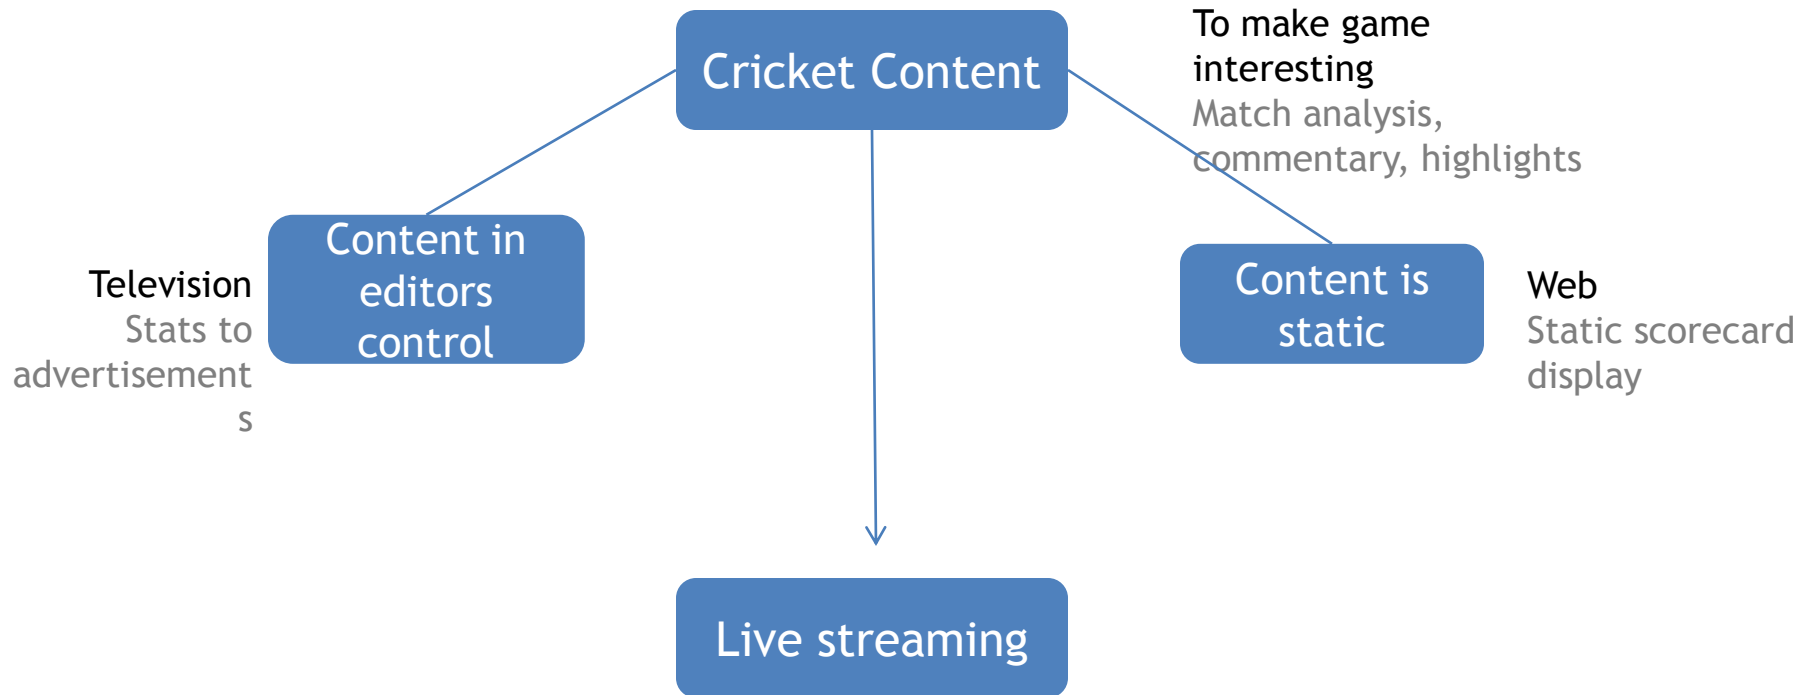

For cricket being a sport, it is much more fun when people are connected/ together while watching the game

Methodology

Background study

Background study

Television
130 million viewers
in the first 33 matches of IPL3

of IPL

Background study

Scheduling

Asia Cup (Jun 15 - Jun 24, 2010)

Match	Venue	Date	Match Time
1st Match - SL v Pak (D/n)	Rangiri Dambulla International Stadium	Jun 15, 2010	02.30 Pm
2nd Match - Ban v Ind (D/n)	Rangiri Dambulla International Stadium	Jun 16, 2010	02.30 Pm
3rd Match - SL v Ban (D/n)	Rangiri Dambulla International Stadium	Jun 18, 2010	02.30 Pm
4th Match - Ind v Pak (D/n)	Rangiri Dambulla International Stadium	Jun 19, 2010	02.30 Pm
5th Match - Ban v Pak (D/n)	Rangiri Dambulla International Stadium	Jun 21, 2010	02.30 Pm
6th Match - SL v Ind (D/n)	Rangiri Dambulla International Stadium	Jun 22, 2010	02.30 Pm
Final - TBC v TBC (D/n)	Rangiri Dambulla International Stadium	Jun 24, 2010	02.30 Pm

Mobile Phone as a medium

1. Easy access anywhere
2. Overall rich experience
3. Staying in touch
4. Good reach in India

Mobile phone reach in India is set to reach around 737 million by 2012. It is estimated that India already has more number of mobile phones (around 545 million) than toilets (around 366 million) according to the UN.

3G as technology

1. Live Streaming
2. Better Quality
3. Video Conferencing
4. Good Growth in India

3G enabled mobile phones reach in India is set to reach around 30 million by 2012. Considering that research on 4G is already underway, mobile phones of the future will be providing a rich multimedia experience.

Background study

Interestingness in the content

Importance/ Significance

Sachin Tendulkar hits his 45th test century.

Unexpectedness

A bowler coming in and scoring a 50 in quick time.

Neighbourhood

How well can India fare in a seaming track?

Thresholds

1) Individual

Scoring a 100 is as significant as scoring 149

2) Context Dependant

No one has scored more than 80 against NZ in NZ

3) Poor Performance

Sehwag holds record of maximum ducks against OZ

Anticipation

Can Sehwag score a hundred at least this time with him getting out on 90's for past 3 tests?

Relative Significance

How is performance of one player significantly better than another player in a match

Opportunity for significance

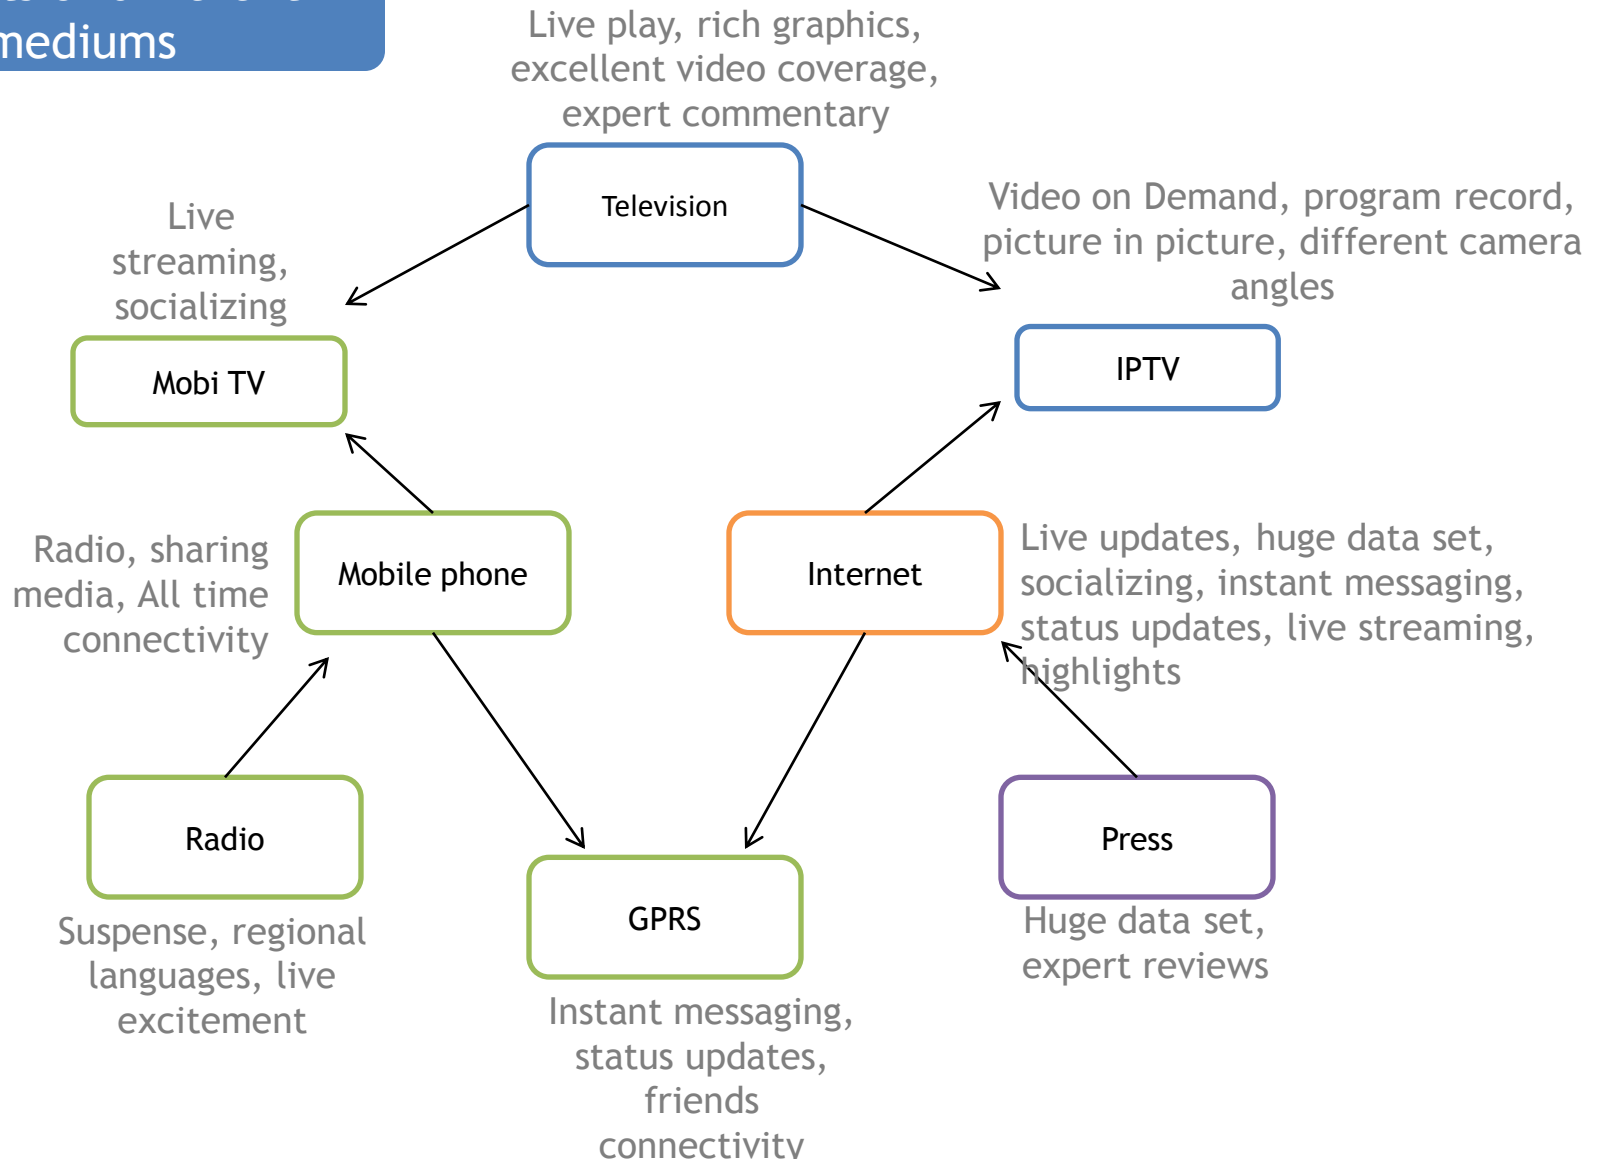

Can Mishra take one more wicket to equal record with six wickets of opponents left?

Closeness of a record being broken

Sehwag is not out on 393 and in good form.

Watches cricket occasionally: 2

Research

Cricket Graphics

Context specific graphics

Excitement Builder

Audio commentary builds excitement

User Control

- Advertisements are an unwanted distraction although some feel it as a necessary break
- Users want to see the context specific information when they desire to see it

Socializing

Like to listen to stories, view points, facts etc.

Personalization

Specific interest on the different kinds of information being shown

Want Regular Updates

Ready to send SMS, ready to stand in a crowded showroom

Adapt to new mediums

Download new cricket applications

Creating an avatar, having a star icon

On the move

Users do not want to miss matches being stuck up in traffic or when having a long day at the office.

Record and replay

Users do not want to miss out on any action of the match while doing multi tasking.

Match history at a glance

Understand the summary of the match at one go

Share experiences

Like to share stadium experiences, meeting cricket stars etc. along with his family and friends

Design Brief

Design Brief

The aim of the project is to develop a mobile interface that enhances the current cricket viewing experience for the viewers viewing on a mobile phone.

Essential Parameters:

1. The mobile interface must be easy to use for a user on the move.
2. It must be intuitive enough for the user to understand the match summary in a jiffy.

Desirable Parameters:

1. It must be able to provide user the control to view what information he wants to see intuitively and easily.
2. Options provided in the interface must be personalized to the user's needs and requirements.
3. The application must bring about the feeling of togetherness with friends/family while watching a cricket match.

Incentives:

1. The features applicable to the mobile interface can also be synched with the user's computer for him to provide additional options for viewing the game.

Scenarios

Usability Evaluation

Think aloud test | 3 users

Navigation

“After the first attempt can easily navigate through the options”

No icon to come out of the application!!

Interface design

“I Want to pick the color of the interface”

Nomenclature

Certain icons needed help to be understood,
Example: Match Summary, Radio match update

“Icons can change according to the tournament”
For example, icons and content can be related to IPL
<implemented>

Future Scope

1. An actual model can be made and tested out for live streaming capabilities
2. There can be an online version of the same application which allows users to make their profile in office and also interact through their mobile phones.
