A Study of Signage in IIT Bombay at Present

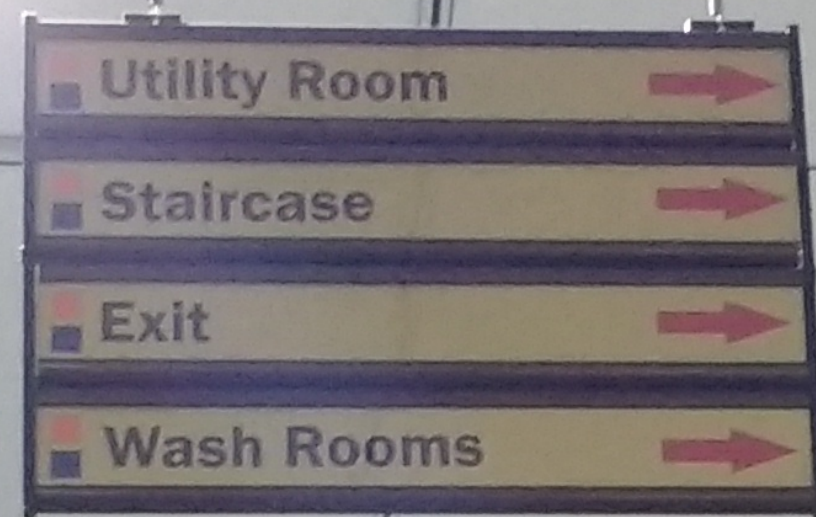

Signage in IITB-Monash Research Academy

Signage is small and placed very high from eye level

Signage in-front is not visible

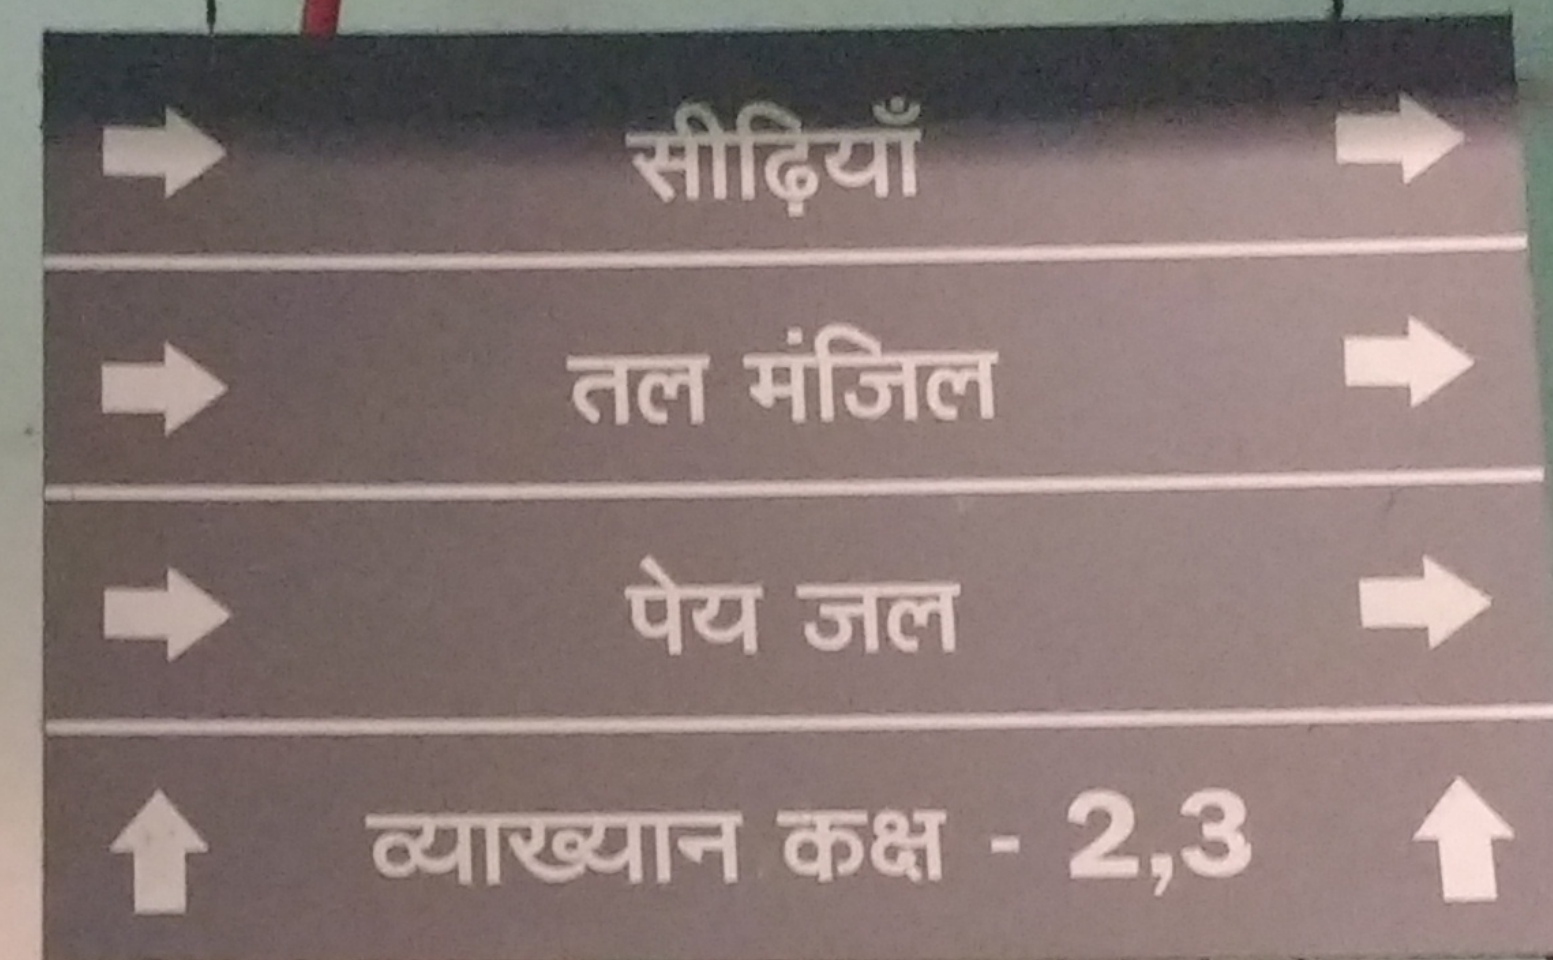

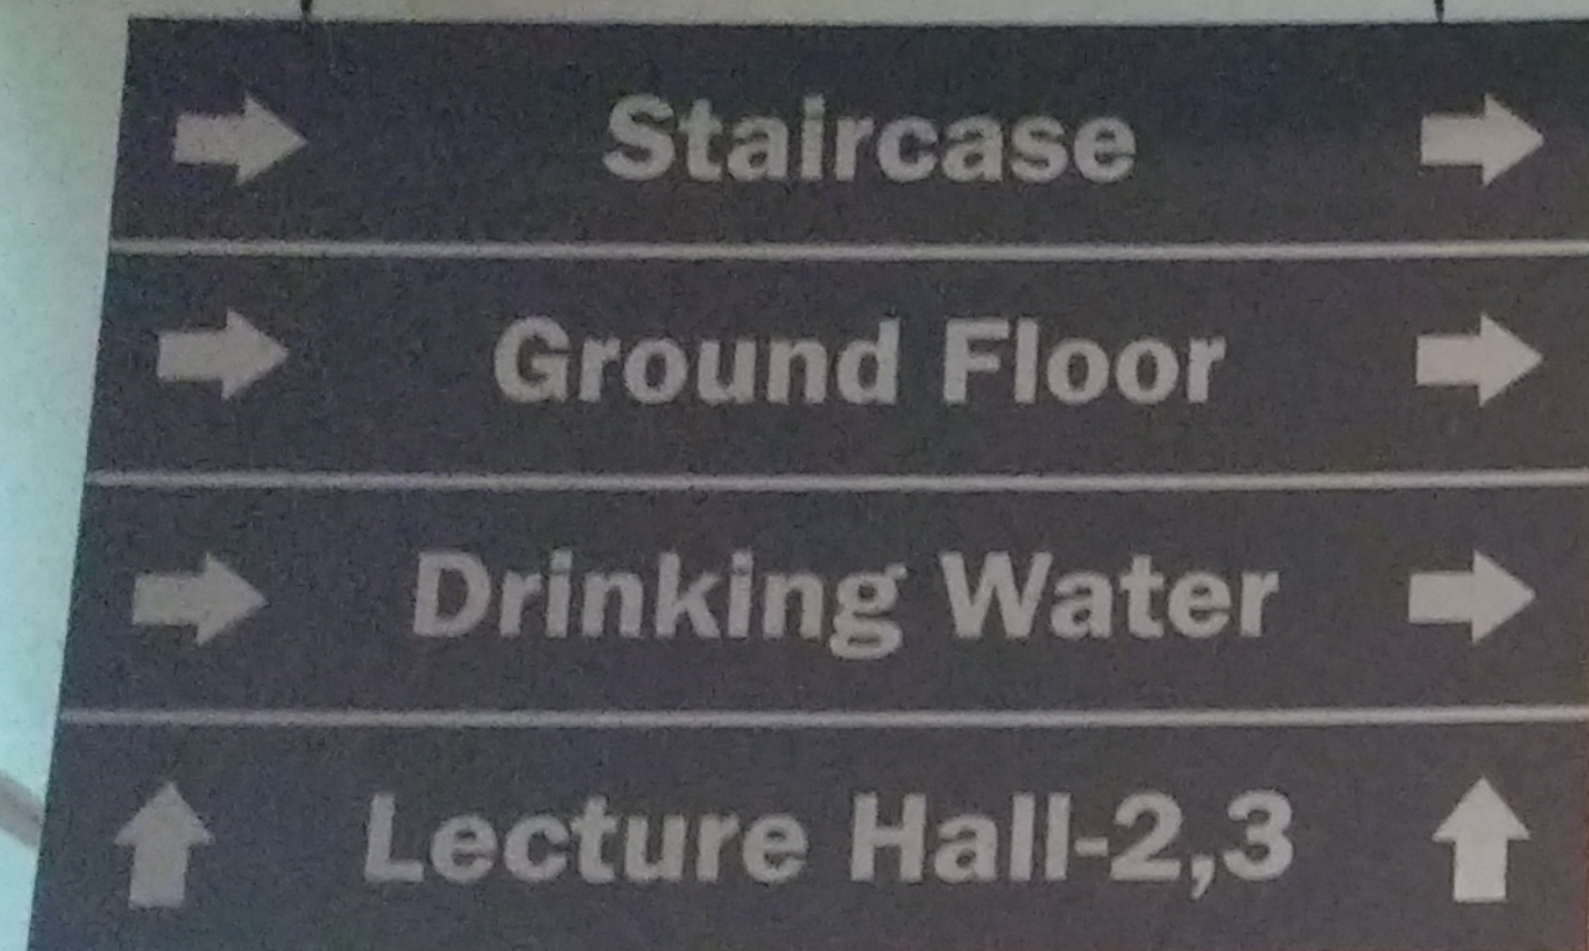

Signage is placed opposite spot light

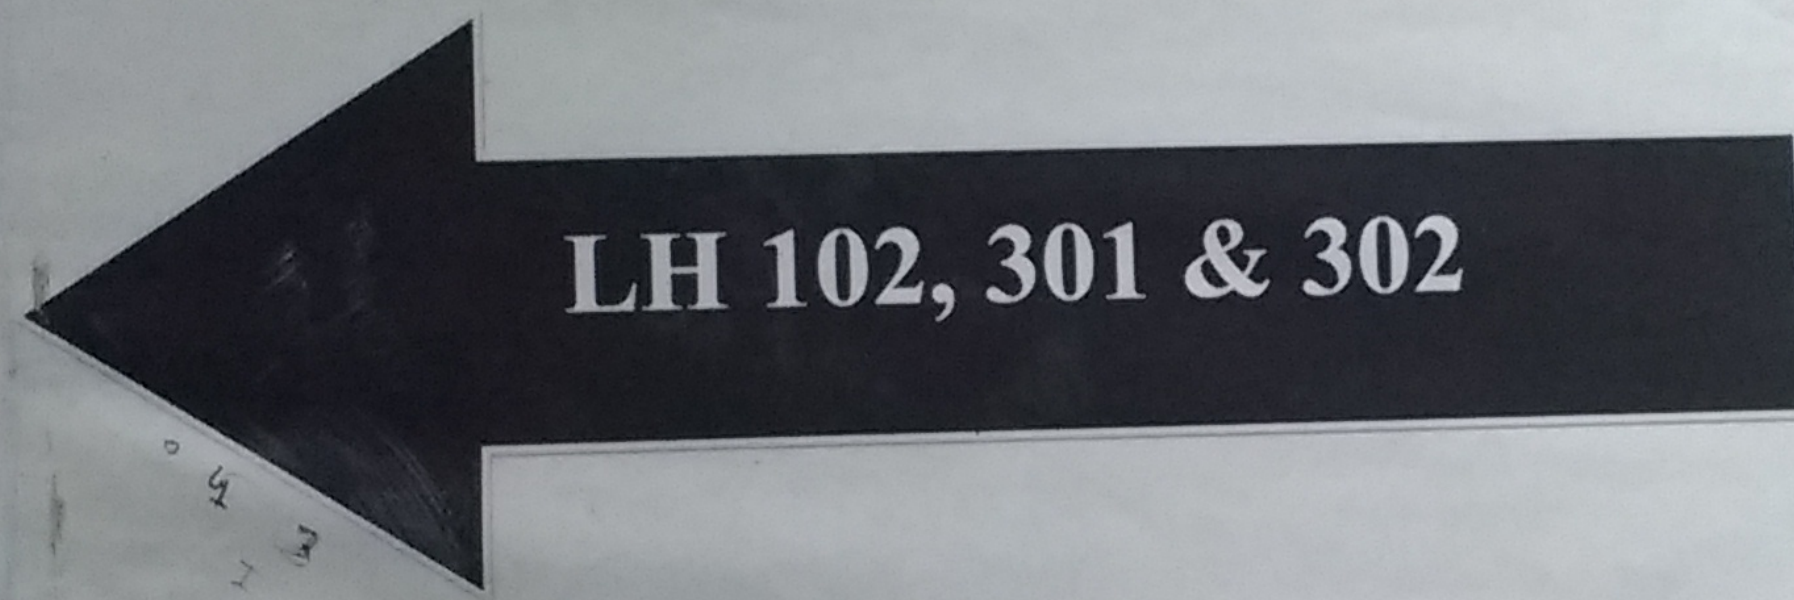

Findings

- Only in English.
- Neither legible nor visible in first glance from distance.
- Placed extremely higher than eye level.
- Lighting was not kept in mind.
- Made internally by someone working at IITB.

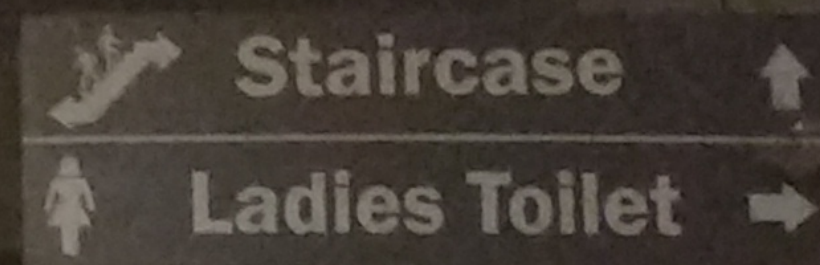

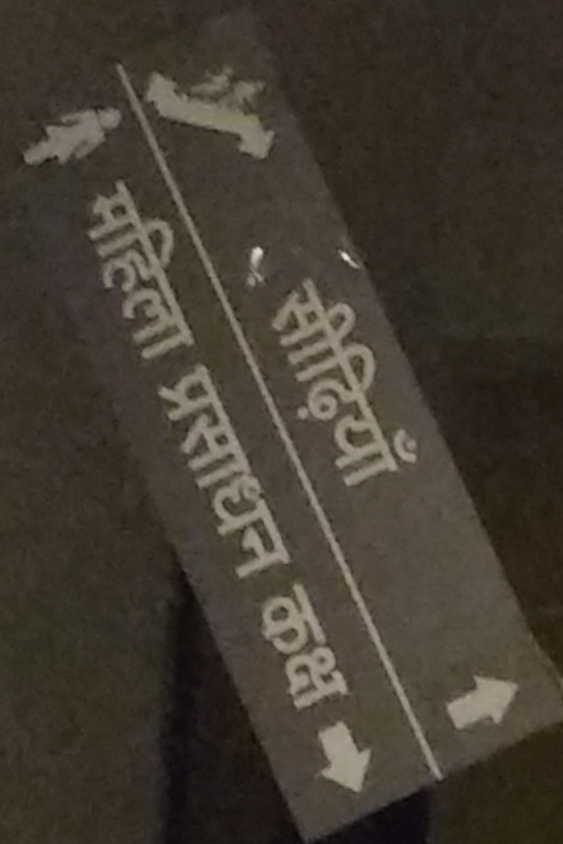

Signage in IITB-Lecture Complex

Two different signage for each language

Pasted couple of steps ahead

Poor build quality

Push / Pull signage wasn't planned previously

Floor signage are not lit

Findings

- Bilingual signage.
- Legible and visible from distance.
- Door pull / push signage was not planned.
- Lighting for floor signage was not kept in mind.
- Poor build quality.

Prof. Sudesh Balan

- Over the time and as per requirement, various signage have been put-up in IDC.
- These designs lack harmony with the initial signage put up at staircases.

Need of Designing a New Signage System for IDC

Need of designing a new signage system for IDC

- All places require door signage.
- B.Des. classrooms have been made.
- New conference room was built.
- Library has been shifted.
- Ignition studio was built.
- Senior M.Des. studios were reshuffled.

Need of designing a new signage system for IDC

- Existing signage on display has missing and outdated information.

The project intends to help visitors find out places in IDC such as office, faculty cabins, class rooms, workshops and studios etc. At present, we don't have a proper signage system to help visitors find out specific locations.

Desirable Qualities of Signage System

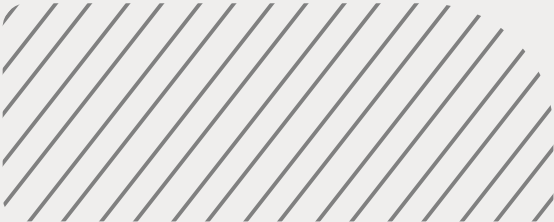

- Bilingual signage
- Colour coding for floors
- Legible from distance
- Visibility from distance
- Style standardisation and harmony
- Cost-effective material choice
